

ATHLETICS

“Upon the fields of friendly strife are sown the seeds that bear the fruits of victory —.” These words by General Douglas MacArthur have become an inherent part of the challenge that is met by the PMC athletic program.

As a component part of its educational philosophy, an athletic program has been incorporated in the curriculum of the College. Participation in athletic activities contributes to the objectives of the institution, the preparation of its students for leadership in the affairs of business and industry, and the development of good citizenship.

The program aims to provide opportunity for the students to improve their physical well-being, to contribute to the growth of their emotional maturity, and add to their leadership potential.

The 1965 football season for P.M.C. had reversals; however, there were long standing records broken by some individual members of the team.

The story of the games cannot be fully told by a pictorial presentation. Bob Grosch, Larry Geter, Steve Bender, Terry Grow, Chick Goebel, Tim Joyce, Fred McGuiney, Pete Rohana, Rosy Roselle, Bob Templin, Clark Wonderland and Bill Yarnall played sixty minutes of great football in each game, and energetically battled those last minute losses which came to the team so often.

With our excellent staff, headed by Art Raimo, the spirit and will of next year's team promises to match the best of any.

Halfback Frank Pellegrini, injured after the Moravian game and missed by the squad for the remainder of the season.

Flanker Tim Joyce dives for a Yarnall pass in vain.

PMC safety Dick Cartwright holds Seike Murono of Franklin and Marshall College to short yardage.

Fullback Joe Piela is seen being tripped, after gaining 45 yards.

Split-end Bob Grosch catches pass which slipped through opponents' hands.

Head coach Art Raimo sends in a play with offensive guard Lenny Frampton.

Grosch snags low pass from Yarnall.

... Those accounting majors, "checking things out."

November, 1965

TO WHOMEVER IT MAY CONCERN:

The students from Pennsylvania Military College have been most helpful in helping brain injured patients at Crozer Chester Medical Center, through exercising known as Patterning.

This procedure provides the injured brain with valuable sensory feedback, permitting it to function in a more efficient manner. The brain relates the individual to his environment; and reinforcement of this environment with Patterning feedback, aids the injured center of the nervous system to first perceive the sensory surroundings and then to react to that environment.

These young men from the college have arranged a systematic work schedule to report to the hospital, on a voluntary basis. Their interest and kindness have aided us in this work at the Center.
