

Penn Morton Gains Two New Deans

PMC Colleges' president Dr. Clarence R. Moll has announced the appointments of Jerome F. Hughes and Elizabeth F. Schieck as Dean of Men and Dean of Women for Penn Morton College.

Dean of Men

A native of Phillipsburg, Pa., Hughes holds the bachelor's degree from Lock Haven State College and the master's degree in education degree from Pennsylvania State University. He has also done graduate work at Montana State College. For the past four years, Hughes has been assistant director of admissions at St. Vincent College, Latrobe, Pa. Previously, he was a guidance counselor in the Hempfield Area Schools in Greenburg, Pa. and a teacher in Mashannon Valley High School in Madera, Pa.

From February, 1965 until last month, Hughes was chairman of the policy board of the Westmoreland County Conference for Economic Opportunity (Poverty Program). He is a member of the American Personnel and Guidance Association.

Dean of Women

A native of Chester, Miss Schieck has been associated with PMC since 1934. For the past year she was assistant dean of student personnel. Previously, she held positions of director of administrative studies, registrar, alumni secretary, administrative as-

(Continued on Page 6)

Nayar to be In Residence

The appointment of Dr. V. K. S. Nayar as visiting professor of political science at PMC Colleges has been announced by Dr. Clarence R. Moll, president. Dr. Nayar will be in residence for the academic year 1966-67, which begins in September.

Political Science Chairman

A native of India, Dr. Nayar is coming to PMC from the University of Kerala in Trivandrum, India, where he has been chairman of the political science division since 1957. The university has 140 colleges affiliated with it, and a total enrollment approximating 115,000. Dr. Nayar has also taught at Mahatma Gandhi College in Trivandrum.

Fulbright Scholar

He holds the bachelor's and master's degree from the University of Kerala, and a master's and Ph.D. from Yale University. While at Yale he was a Fulbright-Smith-Mundt Scholar and a Cowles Fellow. His doctoral dissertation dealt with an analysis of the major influence in the drafting of the Indian constitution.

Professional Memberships

Dr. Nayar's monographs have been published in both English and Indian languages, appearing in many professional journals. He holds memberships in both the Indian and American Political Science Associations, and in the Association of South Indian Political Scientists. He is a member

(Continued on Page 6)

Additions in Faculty are Announced

I. K. Aneja has been appointed assistant professor of engineering.

A native of India, Professor Aneja earned the bachelor's degree from the Institution of Engineers in Calcutta, and the master's degree in Civil Engineering from the University of Pennsylvania. He is currently studying for the doctorate in Civil Engineering at Penn State. He holds memberships in the American Concrete Institute, the American Society of Civil Engineers, and the Institution of Engineers (India).

Professor Aneja formerly was associated with A. W. Lookup Company as a structural design engineer, and with the New Delhi (India) Central Public Works as a design engineer.

Dr. Carlos R. Allen, Jr.

Dr. Carlos R. Allen, Jr. has been appointed acting head of the department of history and associate professor of history at PMC Colleges.

A native of Camden, N. J., Dr. Allen holds both the bachelor and master of arts degrees from the University of Virginia, and the Ph.D. from the University of California. From 1957-66, he was on the faculty of the Colorado State University, most recently as associate professor of history. He previously taught at the U. S. Air Force Academy.

A veteran of World War II, Dr. Allen holds memberships in the American Historical Association, the Organization of American History Professors, and Phi Alpha Theta.

John T. Meli

John T. Meli has joined the faculty of PMC Colleges as a lecturer in accounting.

A native of Chester, Pa., he received the bachelor of science degree from St. Joseph's College and the master of business administration degree from the University of Pennsylvania. He is currently a candidate for the Ph.D. degree from Penn.

Meli comes to PMC from St. Joseph's, where he had served on the faculty for nine years. He is a member of the Industrial Relations Research Association, Society for the Advancement of Management, and American Academy of Political and Social Science.

Meli is married, has two sons, and lives at 3734 Ridgewood Lane in Brookhaven.

L. K. Chi

L. K. Chi has been appointed assistant professor of mathematics at PMC Colleges.

A native of China, Professor Chi holds the bachelor of science degree from Taiwan University in Formosa, and the master of arts degree from the University of Maryland. He is currently studying at Drexel Institute of Technology.

He taught at the Community College of Philadelphia in 1965 and was a research scientist employed by Space Sciences in Waltham, Mass., from 1962-65. He is a member of the American Physical Society.

Professor and Mrs. Chi live at 3230 Albemarle Ave., Drexel Hill. They have one daughter.

Dr. Thomas F. Decaro

Dr. Thomas F. Decaro has been appointed associate professor of biology at PMC Colleges.

A native of Brooklyn, N. Y., Dr. Decaro holds the bachelor of science degree from Rutgers University, the master of science degree from the

(Continued on Page 6)

Pew Memorial Lecture

Morgenthau Speaks on U. S. Foreign Affairs

Dr. Hans J. Morgenthau, Professor of Political Science and Modern History, and consultant to the Departments of State and Defense, spoke on "The United States, Europe, and Asia" in Kirkbride Hall on September 16, at the second annual John G. Pew Memorial Lecture.

Professor Morgenthau stated that the priorities of American foreign policy today are based on "the intellectual and moral capital" formulated in 1947 by the Truman Doctrine and the Marshall Plan. He explained how the policies of the U. S. have remained static, while the world situation has changed radically.

He began by pointing out that the world economy has changed completely. Europe has recovered its "inner breath" and no longer needs the financial aid of the U. S. as it did in the post-war years.

Militarily, Morgenthau said, the U. S. no longer has a monopoly of nuclear weapons. He believes there is a fear on the part of European nations that the U. S. may "sell them down the river" by making arrangements with the Soviets.

Morgenthau explained that this is one reason for DeGaulle's violent criticism of the U. S. He added Washington has made a "whipping boy" of DeGaulle and that most European leaders are thinking the thoughts that DeGaulle expresses vocally.

The change in the face of communism is a major change, Morgenthau said. A disintegration of the monolithic nature of communism has taken place. Today there are four types: (1) the pro-Soviet, (2) the pro-China (Albania), (3) those countries

which "straddle the fence" between China and Russia (Rumania) and (4) the independent countries (Yugoslavia).

Morgenthau explained that the use of the old guide lines of "containment" is the source of the Viet Nam problem. He said that China cannot be contained militarily as was the Soviet Union. He suggests the way to "contain" China is to surround it with neutral countries.

Professor Morgenthau stated that Vietnam has been, historically speaking, a natural enemy of China. By fighting in Vietnam, the U. S. is "delighting" China by eliminating one of the ancient thorns in its side.

A complete end of military involvement is the solution to the Viet Nam problem, according to Morgenthau, and this could be effected in one or two years through a series of negotiations. These negotiations could be manipulated so that the U. S. would lose very little prestige in the eyes of the world.

Morgenthau stated that the biggest obstacle is that the U. S. leaders lack "courage and wisdom needed to make the decision to "pull out."

Dr. Morgenthau was education at the Universities of Munich and Frankfurt. He has taught at the University of Geneva, University of Madrid, Brooklyn College, University of Kansas and presently is a member of the University of Chicago faculty.

In the field of political science, Dr. Morgenthau has written a number of books. Among them are *Politics Among Nations*, *The Purpose of American Politics*, and *Dilemmas of Politics*.

Dr. Murphy Named Dean

School of Engineering is Formed After 104 Years

The establishment of a School of Engineering at PMC Colleges, with Dr. Arthur T. Murphy as dean, has been announced by Dr. Clarence R. Moll, president.

For 104 years, PMC has offered a program leading to the bachelor's degree in engineering. Since 1962, the program has been administered through a division of engineering, with Dr. Murphy as director.

Dr. Moll said that significant advances in curricula offerings and a major expansion in faculty scholarship and research activities were prime reasons for the new identification.

"The elevation of the engineering program at PMC Colleges during the past four years has been outstanding," he said.

"Dr. Murphy and his associates have developed a core curriculum for undergraduates, and in the forthcoming academic year are beginning a graduate program with a major in systems engineering.

"A senior project activity has been introduced in which teams of senior students undertake a complete semester development and design project under the guidance of a faculty member.

The faculty has been engaging in continuous research, funded from both public and private sources, with their findings regularly reported in professional journals. This new identification of both the engineering program and Dr. Murphy is very meaningful."

During the past four years, Dr. Murphy has introduced an extensive revision of the engineering program at PMC. Staffed with an almost new faculty, an interdisciplinary core cur-

riculum was developed, replacing traditional programs in civil, mechanical and electrical engineering. The major portion of the student's work is comprised of an engineering core of courses, but also includes humanities and social studies. The degree received is bachelor of science in engineering.

At PMC it is felt that the traditional programs of specialization, such as electrical or mechanical engineering, should occur at the graduate level.

Another major change has been the approach to laboratory instruction, in which formal course-associated laboratory work has been replaced by project laboratories.

A program is being introduced this month leading to the degree of master of engineering, with a major in systems engineering. It will be the first graduate degree program in the 145-year history of PMC. The student will be taught how to participate in the planning, design, construction and operation of large systems, such as environmental control, refineries, mass transportation, and communication networks. The graduate of the program should be well-equipped to function as a systems engineering generalist or as a manager of technological or corporate activities.

The School of Engineering has recently introduced a program entitled *Preview of Modern Concepts in Engineering*, in which high school students and teachers will be instructed in certain areas of engineering. It is initially supported by a grant from the Philadelphia Foundation and directed by

(Continued on Page 6)

New Division Heads Named

Appointments of several department heads in the divisions of liberal arts, management and economics, and science at PMC Colleges have been announced by Dr. Clarence R. Moll, president.

Liberal Arts Division

Faculty who have been named in the liberal arts division are Dr. Charles B. Smith, English; Dr. Robert C. Melzi, modern languages; Dr. Carlos R. Allen, Jr., history (acting); and Dr. Franz B. Gross, political science. Dr. Gross, who is also chairman of the liberal arts division, is on leave of absence for the academic year 1966-67 while teaching at the University of Dakar, Senegal, Africa. Dr. John W. Hopkirk will assume Dr. Gross's dual functions at PMC in his absence.

Science Division

New department heads in the science division are Dr. John L. Prather, physics; Dr. Irvin M. Gottlieb, chemistry; Prof. Francisco J. Navarro, mathematics (acting); and Dr. Joseph J. Storlazzi, biology and earth science. Dr. Storlazzi is also chairman of the science division.

Management & Economics

Appointed departments heads in the division of management and economics are Dr. George M. Powell, economics; and Prof. Eugene C. Hassler, accounting.

In all companies there are more fools than wise men, and the greater part always gets the better of the wiser. — Rabelais.

Macke Food Is Choice Of Students

A new food service, the Macke Company, has begun operations on the PMC Colleges campus after dissatisfaction brought about the dismissal of the Slater Food System last year. Macke comes to PMC as the choice of a group of students representing both colleges here.

The Macke organization was chosen to serve PMC Colleges on the merit of several policies which have already been acknowledged by members of the student body as "vast improvements over last year."

Milk is available to the student in unlimited quantity at no charge. The meals will be planned by a full-time dietician, and menus will be published and posted. A flat rate will be charged instead of having a price for each article of food, as was the case last year.

One of the problems faced by any college mass-feeding program is that of boredom resulting from lack of variation in the meals. Macke hopes to solve this problem by providing a minimum of twenty festive or monotony-breaking meals over the school year. The new food service has suggested buffets, smorgasborgs, steak cook-outs, a Thanksgiving dinner, and a Christmas dinner. There will be at least two of these occasions each

(Continued on Page 6)

Editorial

Fall at PMC will see the resurgence of efforts to improve communications between the Student Body and the Administration, and an effort to make these communications productive. Lack of communication on this campus has been a constant cry, but there has never been any attempt to define "communication."

Should the President of PMC Colleges, the Dean of Penn Morton College and the Commandant of Pennsylvania Military College sit at a tea and discuss problems? We think not. Yet this and proposals to form committees, to draw up lists of grievances and to hold meetings have been the only suggestions ever

offered, and they have, for the most part, proven useless.

It is not that communications are non-existent at PMC Colleges, it is rather that they are timed in such a fashion as to make any responsible comment or suggestion ineffectual and of a post-hoc nature.

For example, recall the beginning of last year when for the first time we were informed of the decision to adopt a dress code. Note, we were not informed of "plans" to adopt a dress code, but of the "decision" itself. Since that time committees, meetings and discussions have accomplished nothing but delay of actual enforcement of the code. The code is still with us,

and there is no reason to believe that it will not remain with us.

There was certainly no lack of communication here, but only an announcement sufficiently delayed so as to insure no possibility of reversing the decision.

A solution must include provision for negotiations where issues can be solved. We are certainly not proposing control of the College's decision making policies, but on issues that directly effect the students such as the dress code, the Yearbook, the parking lots and similar matters, we would appreciate the opportunity to voice our opinions in a positive vein before the Administration has reached a decision.

From the Dean of Penn Morton

Student Stresses Are Seen

By Jerome F. Hughes

Dean of Men, Penn Morton College

I was delighted last week when your editor asked me to submit an article for the newspaper. It will give me an opportunity to keep you informed of the activities of this office, and it will also enable you to react to the opinions expressed here so that we may find solutions to our mutual problems.

Dress Code

I shall begin with the dress code. After listening to the fine speech by President Moll on Friday, September 16, I thought his appeal to you to enforce the code yourselves without any administrative involvement should be met as a challenge.

You may disagree with the code, but like all other rules and regulations of our land, we as mature adults should recognize that we must obey these rules regardless of our personal feelings. Otherwise complete anarchy would result. The tendency in our quest for freedom is to have freedom without responsibility but freedom and irresponsibility are not compatible.

In view of the fact that most of the student body has accepted the dress code, I hesitate to introduce a system of fines. However, if the student body does not fully respond I will have no choice.

The Manners Problem

The next area for discussion is that of manners. It has been brought to my attention that the general conduct of the PMC College students during dances leaves much to be desired. To be specific, the relation that our students have shown with the visiting college girls has been at times vulgar and extremely rude. Is it a wonder that girls of college age are hesitant to attend these dances? This demonstrates a lack of maturity and a lack of concern for the dignity of a human being.

If PMC Colleges is to have a successful relation with the girls of other colleges in the area, the entire student body must make a cooperative effort to improve this situation. To accomplish this Dean Cottee, Dean Schieck, Sgt. Cloud, and Mr. Garner are planning to invite the Deans of Women from all of the local girls colleges and those in charge of the nurses group at PMC to PMC Colleges to discuss this situation. We are going to invite the student organizations to sit in with them and to work out the problem. A good rapport must be developed with the girls colleges in the area. Otherwise a degeneration takes place, as we have seen. The student should accept the responsibility for his own conduct.

New Weekend Activities

Every weekend should have a particular emphasis on good, mature involvement. After such a conference as mentioned above, I propose to schedule weekends for each of the girls colleges that will respond, setting aside one weekend per college. If six to eight colleges respond, that many weekends will bring emphasis to social activities on our campus. This would channel energies of the student

to greater success in the academic areas during the week. The weekend would be something to look ahead to. If this is to be a success, the cooperation of the entire student body is imperative.

Another area that has come to my attention which I believe to be worthy of your consideration is that attitude in class by which students put pressure on their fellow students not to ask questions or to talk to the professor for fear that this would put them in a better light with the professor. This has another name, but you make your own judgments.

The above mentioned accusations, if they are true, are serious. There is not a massive number of students in Penn Morton College. Each of you is an individual; each of you must stand or fall on your own individual knowledge when you leave this institution. Each of you is limited to four years here. The amount of knowledge you gain in that time can be measured in dollars and cents, and in many occasions this will relate to the kind of questions you allow yourself to think about and ask the answers to.

Time, in a sense, has a price tag. Ten years from now you as an alumnus will have certain feelings concerning this college. They will hopefully be warm and friendly, and hopefully you will know that you received a fine education from a faculty willing to give answers. It is my wish that you will have taken the time to be one of those who had courage to seek out the answers.

Adoption of Values

Another related subject is the false set of values that has been demonstrated by some of our groups on campus. In a fraternity there is a tendency to give allegiance to brothers rather than to the signed pledge of allegiance to the policies of the college. The protecting and honoring of bad conduct of a fellow brother rather than the attempt to correct such conduct cannot but bring down the level of each fraternity. My emphasis is on the fraternities correcting the situation themselves. In doing this they can be proud of their involvement and action, and you can be prepared to do many good works. This year each of the incoming freshmen will be assigned an upper-classman to assist him in the social and academic areas whenever the need presents itself. I have been impressed with your efforts. It is my hope that the problems I have mentioned will be eliminated so that your success will not be marred.

Open for Discussion

Any comments you wish to make in writing concerning the things I have mentioned will be greatly appreciated. You could do so in a letter to the editor of this paper. I would like to remind the student body of Penn Morton College of the open session to be held on Tuesday evenings in Old Main from 7:00 P.M. to 9:00 P.M. Any discussion can be brought to me here as long as the conduct of the students is mature and responsible.

Student Government to Rid Self of Cob-webs

By Mike Sullivan

Pres. of Stud. Gov. Asso.

In the event that any reader should be confused as to the nature of this column, I feel that I should introduce myself. My name is Mike Sullivan, and I'm your Student Council President. THE DOME staff has kindly allotted me this space to inform you of your Student Council's progress, and generally to speak my mind on pertinent campus issues. And I intend to remain within this general area of discussion. I hope that you will make this column a part of your regular reading in THE DOME; I will keep you abreast of your council, and I will air my own opinions on any events of importance.

The Council has a busy agenda this year. Frankly I'm giving you the low-down now so that you will know what to expect and require from the Council. A little prodding from you would, I think, inspire us to work harder. Anyone will try harder if they are being watched, questioned, and evaluated. So I'm asking you to keep an eye on us. We need your support, time, and encouragement. Without the individual students, Council is handicapped. This promises to be a big year of big things, and we need the entire Student Government Association to make it a success.

New Constitution

To start with, the Council is writing a new constitution. Parliamentarian Blumberg is diligently at work with his committee studying constitutions of neighboring schools. Once we have what we feel is a workable document, it will be submitted to you and an open hearing will be held to hear your opinions and suggestions. Then the constitution will be put on referendum for the approval of the student body. Please make an effort to show your interest by voting, even if you are not in favor of what is offered.

Counseling System

Next, a big brother-little brother counseling system is being set up by IFC with Rep. Garry Klemek working in conjunction. This system is for the benefit of freshmen to aid them in getting settled with their academics. If anyone has any experience with such a system and is willing to volunteer a little of their time, I know that it would be greatly appreciated.

Sadie Hawkins' Day

Our first mixer is on 1 October. The Council, in conjunction with Dean Schieck, is planning to invite female students from local colleges. It is important for the male students of the college to maintain a gentlemanly demeanor at these affairs if these con-

tacts and amicable relations are to continue. Keeping this in mind, I am confident of a successful mixer season. As you can see, the Council is quite ambitious to take a more active role in student affairs.

Dormitory

The campus seems to be a beehive of activity this fall. Unfortunately for some civilian men boarders, there was a noticeable lack of activity in construction of their new dormitory. Thusly, some of the obscure nooks and crannies of the college have become a temporary home for Penn Morton students. After visiting some of the civilian men living in Mac-Morland Center, their evident irritation can be understood. But their quarters are not intolerable, and they seem to be taking it as best they can. Hopefully, they will be in the dorm soon and settled down for the year. It seems rather innocuous to begin a college career living over a pool room. These men are justified in voicing their inconvenience, and I feel that the College owes them something more than an explanation. It is to the credit of the Penn Morton boarders that they are taking such conditions in their stride.

Parking

Since last year, the rear of Howel Hall has been paved and made into a usable parking lot. But along with asphalt, came a parking fee of forty dollars a year for boarders to use this lot. I cannot personally see how the administration can justify such a move. Granted the paving did cost a great deal. But I do not think that anyone assumes a school parking lot to be some sort of special benefit that should come above normal college fees. Security, lighting, etc. are things that are taken for granted in any parking field. But here, we are being charged a large amount of money for something that should be afforded us in the first place. This is not Penn, or Temple. This is P.M.C. Colleges, (Continued on Page 6)

The Office of Student Personnel has made the following announcement:

To hold an elective or appointed office in a campus organization a student must have EITHER a total cumulative average equal to or better than that required for graduation OR have an annual cumulative academic average for the year previous of 2.00 or better: A student whose total cumulative academic average at the end of his first semester falls below that required for his graduation will be ineligible during the second semester to hold an elective or appointed office in a campus organization.

From the Commandant

I can't count the number of times I've heard said "We'll do it better next year."

I don't complain about looking ahead to brighter accomplishments and wider horizons in the future.

But I would like to eliminate some of this putting off till "next time" and do a little more "this time."

And along the same line I don't like re-learning lessons we've already been through once or twice. Better to find a new lesson to learn.

I'm looking forward to not just a "good year" for the Corps but a GREAT year. New lessons. Solutions now instead of later. No repetitions of the same dreary worn-out mistakes. No bogging down with things we already know aren't right.

For a couple of examples:

a. The First Class obviously found the secret to success at ROTC Summer Camp. Having found the secret, we shouldn't have to search for it again.

b. All classes have found what a sweet taste it would be to compete successfully in the academic field. Needn't be satisfied with just a taste anymore—but rather take a great big swallow.

So, without having to dwell excessively on those examples again, new lessons we might master this year (instead of next) are:

The Corps being a lot more aware of how the future Corps depends on the present Corps.

The Corps being a lot more aware of its custodianship of traditions, customs, prerogatives.

And finally the Corps being unshakeably proud to be what they are, look the part, and not let anyone in or out of the Corps change this.

MILITARY INTELLIGENCE

This issue of THE DOME begins a new academic year and provides a good opportunity to reacquaint you with the purpose of this regularly featured column.

The intent of "Military Intelligence" is to bring to your attention information from the Military Science Division and those extra-curricular activities sponsored by it.

FROM THE PMS

Shortly after my arrival at PMC last month, I read the report of this summer's ROTC Summer Camp. PMC ranked third out of fifty nine colleges and universities. Of the 73 PMC Cadets at summer camp, 36 were recommended by their company commanders to be Distinguished Military Students. This is a record of which the Class of 67 can be justly proud. Congratulations! Underclassmen, set your sights now on equaling or even bettering this record when you attend summer camp.

I am proud to have been selected as your Professor of Military Science and am looking forward to a rich and rewarding association with the Staff and Faculty and the Cadet Corps of PMC.

FORD P. FULLER, JR.
Colonel, Artillery
Professor of Military Science

MUSEUM

The museum staff was greatly disappointed to find that no new quarters were made available during the summer months; however they were pushing ahead toward the permanent establishment of a PMC Colleges Museum. They have, for the past several weeks, been actively engaged in a project to completely renovate the existing facility in order to present the inventory in a more professional manner.

Those items currently on hand far exceed the space available for their

display and it is hoped that the present effort will allow more items to be viewed in a less cluttered environment.

BATTERY ROBINET

The battery started out with a bang at the PMC-Dickinson game, as you saw. You probably noticed the new limber acquired late in the spring from Mr. E. Scott Tomlinson, Jr., a PMC Alumnus. This year's gunnery classes are scheduled to commence during the first week in October.

Eight Pennsylvania Military College students have been selected to receive a two-year Reserve Officer Training Corps scholarship given by the U.S. Army.

All begin their junior year this year at PMC Colleges. They are: Steven A. Raho, Robert J. Walsh, Robert B. Stewart, James W. Gray, Denis L. Grealish, Brian L. Clevenger, Charles A. Pendlyshok, Jr., and Kevin H. G. Meredith.

The Scholarship pays for tuition, textbooks and fees and provides for an allowance of \$50. per month for the duration of the award.

The eight cadets were nominated for their scholarship by PMC's professor of military science and other college officials on the basis of their academic and extra-curricular record, performance during the first two years of R.O.T.C., the score received on the R.O.T.C. qualification test, physical qualifications, and interviews by Army officers and faculty members to determine motivation towards a career as an Army officer.

Pennsylvania Military College ranked third of 59 institutions represented at the recently-completed Army R.O.T.C. Advanced Summer Camp held at Indiantown Gap Military Reservation, Anville, Pa.

Seventy-three PMC students attended the six weeks training session from June 18 to July 28. Their total performance was exceeded only by students enrolled at Murray State College (Kentucky) and Virginia Military Institute.

CULTURAL AFFAIRS

Devon Ballet To Perform On Thursday

Three ballets by the Devon Festival Ballet will be presented at PMC Colleges' Alumni Auditorium on Thursday, Sept. 29, at 8 p.m. The program is sponsored by PMC's center for cultural affairs.

The ballets are "Pas De Quatre," "The Stone Pillow," and "Graduation Ball."

A non-profit organization, the Devon Festival Ballet was formed ten years ago to give performance opportunities to students of advanced and professional classes. In 1965, the group was commissioned by The Philadelphia Orchestra to do choreography for the world premiere of "Shenandoah Holiday." It has appeared many times with The Philadelphia Orchestra, participated in the Philadelphia Arts Festival, and appeared widely in surrounding areas.

Evelyn Kenny is director of the Ballet. She received her basic training with Catherine Littlefield and was a protegee of Alicia Markova and Anton Dolin. She has appeared at Radio City Music Hall, Robin Hood Dell, and with the Ballet Russe de Monte Carlo. She is the choreographer and will perform in both "Pas De Quatre" and "Graduation Ball."

Collage and Decoupage Shown Here

A display of decoupage and glass collage and sculpture by Verna L. Rumpff is being presented to PMC Colleges through October 31 in MacMorland Center daily from 9 a.m. to 11 p.m. The exhibit is sponsored by PMC's center for cultural affairs.

Mrs. Rumpff also is displaying a landscape by Thomas Cole, who was associated with the 19th century Hudson River School of American Art.

Decoupage is a delicate art and consists of cutouts of birds, animals or people arranged on a suitable background for a pleasing composition. Examples handed down from the French period of Louis XV and XVI are decorated boxes, screens and fans.

Mrs. Rumpff is a graduate of Cedar Crest College. She studied painting with Sara Rouch Cummings in Media, decoupage with Ruth Hill English at the Bryn Mawr Art Center, and glass molding and collage at the Longboat Key Art Center, Sarasota, Florida. She has exhibited in McGlees Galleries, Ardmore, Bryn Mawr Art Center, Delaware County Federation of Women's Clubs Art Festival, Newtown Square Women's Club, and Delaware County Arts and Crafts League.

SAC Nears Goal

It was announced today that the Social Affairs Committee of PMC Colleges needs only fifty more subscriptions to reach its goal of \$6,000 dollars, set last Spring. The announcement came from the committee's chairman, Mr. Andrew Maillie.

Mr. Maillie also stated that arrangements were already being made to secure the entertainment selected by subscribers. Their names will be released at a later date, he said.

Maillie said he was sure the remaining subscriptions would be purchased by freshman students.

Assistant director of MacMorland Center, the building that houses student activities for recreation, and cultural and social life.

Down Laine's Lane

By Hal Laine
Dome Staff Writer

I just got through registration. It had me worried for a minute. I thought I wasn't going to make it home in time for Thanksgiving! But now we are all back to classes and routine studies, and from all indications it has been a bad year for the Grape. I know it hurts. However, wine consumption is on the decline. When was the last time you had a glass of wine? Don't get me wrong. I'm not advocating an *en masse* chug as a saving crusade for the world's vineyards. Wine is simply not receiving its fair share of attention.

We must take it upon ourselves to bring back the glory and grandeur of the Grape. How often have you heard someone order wine at Colonna's? See! Do you know what happens when we don't order wine? Right, it sits on the shelf. Then do you know what happens . . . it becomes expensive. Now does that make sense? By the time we feel like having a glass of wine we can't afford it. One can hardly help but feel a teary nostalgia when he recalls this cherished verse from the *Rubaiyat of Omar Khayyam*:

"And lately, by the Tavern Door agape,
Came shining through the Dusk an Angel Shape
Bearing a Vassel on his Shoulder, and
He bid me taste of it; and 'twas — the Grape!"

Exhume the Grape! Let's get out there and tackle this problem with all the furor and enthusiasm of a Sociology mid-term.

ATTENTION CADETS

I have heard that no less than thirty seniors have been drafted into the service since last year. And if the fighting continues, as seems evident, many more college students will be forced to enter the service prematurely. This poses a definite problem for those still in school. That being, how to stay there.

However, being as realistic as possible without succumbing to uncontrollable hysteria, I have conjured-up some new inventions to take with you in case it is necessary to make that "trip" which could lead to the great final course in the sky; with no prerequisite.

As an answer to the Saigon Bar raids, I have developed a "body-grenade." It comes in a flip-top can. All you do is pull the tab and drink the contents . . . you have 15 seconds to run into the midst of the enemy before you explode. Or, how about tall grass that bites. We could plant it in with the elephant grass. Maybe it would scare away the elephants. I hear Mattel is producing a revolutionary new weapon in the art of trick warfare; the *talkie*. It is designed to divert and confuse the enemy by provoking him to fire. Actually, the *talkie* is a grenade with a draw-string which can hold as many as sixteen different phrases. It is activated by pulling the string and throwing it into the bushes. It emits familiar expressions such as: "Pssst, got a match?" "Hey Joe, that you?" and typical G.I. curses.

Many other variations are available. For instance, the sound of a passing train, feminine giggles and a few selections by the Red Army Chorus.

A particularly underhanded method of winning a war is by internal subversion. We should place agents in the VC garment factories. That way we could make uniforms without zippers. Keen? The VC would really be caught with their pants down!

But, I guess the best weapon would be to study. Then you could stay here and the only thing you would have to worry about is the big sump pit in the middle of the "parking lot."

We welcome your comments and suggestions. Write c/o Dome, Box 1185.

School of Engineering to Institute a Preview Program

The Engineering Division of PMC Colleges has established a project known as Preview of Modern Concepts In Engineering (PMC in Engineering) which will directly involve high school students and teachers.

The aim is to introduce engineering concepts into the high school curriculum, after first instructing teachers and students in certain engineering areas. Concepts such as the use of computers and principles of automatic control will be taught, which will be on a level with the more traditional high school college preparatory courses of physics, chemistry, mathematics and biology. The program is especially for high school students who will not enroll in science or engineering when they go to college.

The project will be supported in part by a \$10,000 grant from the Philadelphia Foundation. Dr. D. L. Wise, associate professor of engineering at PMC, will supervise the program.

Fifty-four public and parochial high schools in Delaware County, Pa., have been contacted and several have indicated willingness to participate. During the academic year beginning in September it is planned to have high school teachers and students attend seminars on systems engineering and receive instruction in digital computer programming. The purpose of the Seminars is to show in a broad manner the function of an engineer and how his work directly involves him in and affects our technological

society. During the first six months of 1967 it is intended to conduct weekly workshops involving both teachers and students from the high schools. An institute for high school teachers is planned to be held during the summer of 1967.

In announcing the program, Dr. A. T. Murphy, PMC's director of engineering, said, "The need for this activity at the high school level goes beyond the desire to attract students to engineering colleges. Engineering is a distinct field of study and has a methodology of its own which has resulted in the development of all the material benefits of society. In order to better understand the problems of our modern technologically oriented society, an educated individual should be acquainted with the basic concepts involved in the development of this society. One cannot properly discuss the sociological aspects of automatic controls nor the effect of computers on society without some understanding of the engineering concepts involved in these technical areas. It is our hope that the Preview of Modern Concepts In Engineering program will help bring about such understanding."

Dr. Wise said that an extension of the project is planned eventually, whereby technical training will be introduced to high school students who do not intend to go to college. Another plan calls for the college engineering student to work with a teacher in a school located in a culturally deprived neighborhood.

Dr. Lowe Rep For Danforth Fellowships

Inquiries about the Danforth Graduate Fellowships, to be awarded in March, 1967, are invited, according to M. R. Lowe, A60, Prof. of English, the local campus representative.

The Fellowships, offered by the Danforth Foundation of St. Louis, Missouri, are open to men and women who are seniors or recent graduates of accredited colleges in the United States, who have serious interest in college teaching as a career, and who plan to study for a Ph.D. in a field common to the undergraduate college. Applicants may be single or married, must be less than thirty years of age at the time of application, and may not have undertaken any graduate or professional study beyond the baccalaureate.

Approximately 120 Fellowships will be awarded in March, 1967. Candidates must be nominated by Liaison Officers of their undergraduate institutions by November 1, 1966. The Foundation does not accept direct applications for the Fellowships.

Danforth Graduate Fellows are eligible for four years of financial assistance, with a maximum annual living stipend of \$2400 for single Fellows and \$2950 for married Fellows, plus tuition and fees. Dependency allowances are available. Financial need is not a condition for consideration.

Danforth Fellows may hold other fellowships such as Ford, Fulbright, National Science, Rhodes, Woodrow Wilson, etc. concurrently, and will be Danforth Fellows without stipend until the other awards lapse.

Administrative Changes Made

Organizational changes in the administration of PMC Colleges have been announced by Dr. Clarence R. Moll, president. Dr. Moll said the changes were necessary due to the dual college structure of PMC Colleges.

William L. Cottee has been named to the newly-created position of vice-president for student affairs. He was formerly dean of student personnel.

Carl A. Schaubel, formerly staff vice president, is now administrative vice president. He is responsible for business management, operation and maintenance, purchasing and personnel policies.

Charles W. Maloney, formerly director of campus services, is now director of purchasing and personnel.

Raymond J. McCaffrey, who was financial vice president, now is staff vice president, with responsibility for college housing and facilities, government relations, and financial grants and loans.

Additions in the admissions office are David B. Guthrie, assistant director of admissions and Brooke E. Koons, admissions consultant. Guthrie most recently was executive director of the American College Bureau Admission Council. Koons was associated with the National Drug Company in a sales capacity.

Dr. S. M. Sophocles, who was formerly director of cultural affairs, is now dean of inter-college cultural affairs.

Mrs. Jayne Bacon has been appointed assistant registrar. She was formerly with the University of Pennsylvania as recorder in the office of the registrar.

Eugene Cloud has been named as-

Getty Named to Alumni Position

William J. Getty, Jr., of 325 Callender Lane, Wallingford, Pa., has been appointed assistant director of alumni relations at PMC Colleges.

Getty recently retired from the Sun Oil Company, Philadelphia, Pa., after 40 years of service. He was associated with the public relations department where he edited two company employee publications, one of which, *Our Sun*, won Freedoms Foundation awards in 1951 and 1952.

A native of Ireland, Getty attended Pennsylvania State University. He is a member and past treasurer of the Philadelphia Chapter, Public Relations Society of America; a member of the publicity and public relations committee of the United Fund of Chester and Vicinity; and a member of the information committee on air and water conservation of the American Petroleum Institute.

Getty is an ordained elder, deacon and trustee of the First Presbyterian Church in Chester.

He is married to the former Nora Livingston. They have two children, Stephen and Margaret.

Urban Affairs Center is Created

PMC Colleges has established a joint center for urban affairs, according to an announcement by Dr. Clarence R. Moll, president.

Dr. Moll said the center will be a community-service, urban-extension program serving the city of Chester and its environs by means of an interdisciplinary faculty consulting activity. Director of the center is Leonard R. Mann, professor of engineering at PMC Colleges.

For the first year of operation, the joint center has been funded by a grant of \$10,686 from the Department of Health, Education, and Welfare, under Title I of the Higher Education Act of 1965.

"The joint center for urban affairs will be concerned with the interdisciplinary inquiry into the problems of urban planning and design, urban history, structure and growth, urban government and politics, urban social policy planning and urban economic development," said Dr. Moll.

"PMC is the outstanding resource in Chester for intensive assistance to the city's political, administrative and community leadership. Our faculty will aid the municipal government and special groups within the community," he said.

Prof. Mann said that, "In working with the leaders and potential leaders in the community the basic mechanism will be through workshops and conferences. Concentrated studies of community problems will be made and seminars conducted with community leaders."

The center's resources will be used to aid those groups that lack resources of their own by helping them to consider the consequences of governmental long-range plans, possible alternatives, and strategies for implementing the plans utilized. Faculty will serve as resources for helping community leaders to solve such problems as urban design and renewal including housing, and the feasibility of the development of Chester as a major warehousing and distribution center.

Endorsement of the joint center has come from several sources. Chester's mayor James H. Gorbey said that "the city will be most happy to utilize the knowledge of PMC Colleges' faculty in the necessary studies and surveys to rebuild Chester."

Support has come from the Chester Civil Rights Council, Community Action Council of Chester, Greater Chester Movement, and the Chester Branch of the National Association for the Advancement of Colored People.

Professor Mann took undergraduate work at Virginia Polytechnic Institute. His graduate work at North Carolina State College was in the area of regional control and city planning for the civil engineering consulting firm of J. R. McCrone, Jr. A former traffic consultant to the North Carolina cities of Ashboro and Ra-

leigh, Prof. Mann has recently taken graduate work in urban planning at Rensselaer Polytechnic Institute. He was on the faculties of North Carolina State College and the U. S. Naval Academy before coming to PMC in 1962.

PMC has undertaken a number of activities recently which are related

to urban-type problems. Prof. Mann supervised a project by three senior engineers—a design study, report and model as a solution to a proposed downtown Chester renewal project. This has been examined by Chester's urban renewal office. Research is being done on campus in air pollution. Prof. Eleanor M. Logan has conducted

seven institutes on the problems of school desegregation. They have been attended by elementary and secondary school teachers and administrators of the Chester School District and have been designated to aid personnel in working more effectively with the problems of desegregation and disadvantaged students.

You don't have to be a genius to work at G.E.

Near genius is okay.

A near genius with drive, stamina and imagination, that is.

And it doesn't really matter what subject you're a near genius in. General Electric is looking for top scientists — and for top graduates in economics, business, law, accounting and the liberal arts.

Nobody who joins G.E. is going to feel cramped. This is a worldwide

company, and it makes over 200,000 different products. So there's plenty of room to feel your strength — and in some of today's most challenging fields: transit design, urban lighting, jet propulsion, computers, electronics, aerospace, you name it.

Challenges like these have raised a new generation of idea men at G.E. If you're good enough to join

them, you'll find responsibilities come to you early. Your talents are recognized, your work is rewarded — in money and in opportunity.

This time next year, you could be on your way. Talk to the man from G.E. next time he visits your campus. And don't be surprised if he's young, too. At General Electric, the young men are important men.

Progress Is Our Most Important Product

GENERAL  ELECTRIC

PMC Wins First, 21-9

PMC Colleges' 1966 football season got off to a booming start with a well played 21-9 win over the Dickinson Red Devils at Memorial Stadium on September 24. An additional boom was heard from Battery Robinett as Bob McGuiney kicked off to Roger Cook, who was quickly brought down on his own 37.

From this point the game settled down to a dual, with each team exchanging the ball and downs once.

The first break came on a third and eleven for Dickinson. Q. B. Wachter dropped back and threw a pass which was nicely picked off by Bob Walsh, who ran it back to the Dickinson 23. PMC then promptly gave up the ball on downs.

Another break came to PMC when Pat Folley fell on a blocked Red Devil punt. PMC lost the break when, on a third and ten the Devil's Tom Phillips intercepted MacQueen's pass and ran it back to the Cadet 28.

On the following third and seven, Dick Cartwright intercepted for PMC.

PMC again had to give up the ball, after Joe Piela's off tackle run of 39 yards to bring the Cadets within the Dickinson 30.

On the next series the Cadets held, and on the punt Fred Head, with great running and fine blocking, ran the ball back to the Red Devil 29. Here followed an excellent series of calls by QB Bill MacQueen which culminated on a third and goal pass to Joe Piela for the day's first TD. Bob McGuiney kicked the PAT and PMC took a 7-0 lead.

Again it looked like someone was smiling on the Cadets when Nick Katzenbach was hit hard on the kick-off and fumbled. Dick Cartwright recovered and PMC took over on the Dickinson 25.

Here the first half ended with PMC out in front by 7-0.

The second half started with the Cadets quickly getting into trouble as the Red Devils moved the ball deep

into PMC territory. The Cadet defense dug in and held as the Devils settled for a field goal to make the score 7-3 PMC.

After the kickoff another trade took Place, leaving the ball deep in Cadet territory. On a third and five MacQueens pass was intercepted by Ross and a penalty brought the ball half the distance to the goal. On the next play Katzenbach went over to make the score 9-7. Those nine points were all that the Red Devils were to get that day as Tom Baum blocked the PAT.

PMC quickly got back into the game as Joe Piela ran the kickoff back 30 yards to the Dickinson 47. Passes to Kramer and McGuiney quickly got PMC another first. Piela picked up eight more yards on the next play. A pass to McGuiney was ruled incomplete. On the following third and two, Joe Piela slashed off tackle for 30 yards and a PMC touchdown. McGuiney kicked the PAT and the score was PMC 14 and Dickinson 9.

From here till late in the fourth quarter it was to be a battle of the defenses.

Fred Head ran back a Dickinson punt to the 43. MacQueen then passed to Pearson for 38 yards and brought PMC to the five. MacQueen then threw to Head and PMC had another TD. McGuiney kicked the PAT and the score was 21-9 PMC. From there the game was all but over.

Coaches Are Reorganized

Two changes in the makeup of PMC Colleges' football coaching staff have been announced by athletic director George Hansell. Ben Coren, former star guard at West Chester State, has been appointed varsity line coach, replacing Jack McCullough, who has been named assistant freshman coach. The frosh post was relinquished by John Udovich due to guidance work being added to his teaching duties at Chester High School.

Coren, a native of Philadelphia, won All-Public laurels at West Philadelphia High School. He attended the University of Nevada in 1943-44 and West Chester State from 1944-48. At West Chester he earned Associated Press Little All America, All America Honorable Mention and All East recognition as a center.

His previous grid coaching includes assistantships at Dickinson and Cheyney State, and head positions at West Chester High School and Penn-Delco Union School District.

Coren holds the bachelor of science in physical education and master of education degrees from West Chester and is a doctoral candidate at the University of New Mexico. He is a physical education instructor in the Penn-Delco Union School District.

McCullough, a 1959 PMC alumnus, began coaching at his alma mater last year. He is director of tutoring services at the Colleges.

The rest of the PMC coaching staff remains intact with head coach Art Raimo, assistants Stan Freedman (backfield) and Chuck Hall (ends), and head frosh mentor Harry Miller.

Durney to Instruct Phys. Ed. & Wrestling

The appointment of Harry Durney as head coach of wrestling and cross country, assistant coach of track, and instructor in physical education at PMC Colleges, has been announced by George Hansell, athletic director.

Durney has been at PMC since 1965 on a part-time basis as assistant coach of both wrestling and track.

A native of Philadelphia, Pa., Durney holds the B.A. degree from the University of Pennsylvania, where he was a member of the wrestling team. Durney served in the U. S. Navy from 1950 to 1954, and in the 1951 All-Service Tournament he was the 170-pound titlist.

He taught science and coached track and cross country at Nether Providence High School in 1961-62, and at Chester High School from 1962-66. He also has coached the Chester Girls Track Club.

Durney is married and has two children. He lives at 113 Ridge Road, Media, Pa.

Professor William J. Zahka (left) faculty advisor to the PMC Colleges Chapter, Society for Advancement of Management, congratulates (left to right) SAM members Marv Shipp, James Walls and Past President George Frame.

SAM Gets Membership Award

A Membership Growth Award in recognition of a significant increase in membership during the academic year 1965-1966 has been given to the PMC Colleges Chapter, Society for Advancement of Management, it was announced by Professor William J. Zahka, faculty advisor.

The winning of the award, which was presented by the University Division of SAM, was the result of an

increase in membership of 62% by the local chapter.

The Membership Growth Award is only one of many different awards given by SAM's University Division in order to "encourage policies, activities, and procedures that strengthen the chapter, increase its value and service to its members, and embody good management organization, planning and control."

Faculty Additions

(Continued from Page 1)

University of New Hampshire, and a Ph.D. from the University of Pennsylvania. He was a post-doctoral Fellow at the University of Pennsylvania Medical School.

Dr. Decaro previously was a member of the faculties of St. Michael's College and Villanova University. A veteran of World War II, he holds memberships in the American Association for the Advancement of Science, American Society of Zoologists and the American Society for Cell Biology.

He lives at 2420 Parkview Drive, Norristown, Pa.

Dr. Gerhard Mally

Dr. Gerhard Mally has been appointed assistant professor of political science at PMC Colleges.

A native of Vienna, Austria, Dr. Mally is a graduate of the law school of the University of Vienna. He holds the master of arts and Ph.D. degrees from the University of Pennsylvania. His most recent position was as consultant and associate editor of the journal "Atlantic Studies," published in Paris by The Atlantic Institute.

Dr. Mally practiced law in Austria before coming to the United States in 1960. He has served on the faculties of the University of Pennsylvania and St. Joseph's College, as well as being a lecturer on Atlantic affairs at Italian and French special institutes. He has also taught international relations in PMC's Evening Division.

Dr. Nickander J. Damaskos

Dr. Nickander J. Damaskos has been appointed associate professor of engineering at PMC Colleges. He received his bachelor of science degree from CCNY, his master of science from the University of Wichita. While there, he also received his M.S.E.E. Dr. Damaskos earned his Ph.D. at Carnegie Institute of Technology.

Dr. Damaskos has taught at the University of Wichita and at CIT. He has also worked as an engineer for Boeing and the U. S. Government. He is married and has two children.

Philip M. Park

Mr. Park has been appointed to the position of lecturer in English. He is presently working on his Ph.D. in English at the University of Pennsylvania. Mr. Park was assistant professor of English at RPI and has taught English at Penn, and at Musking College in Ohio. He has resided for two years in France and eight years in Germany.

Boris I. Rogosin

Boris I. Rogosin has been appointed to the position of lecturer in history at PMC Colleges. He is presently working for his Ph.D. at Harvard University.

Dr. Mohammed Ghaznavi

Dr. Mohammed O. H. K. Ghaznavi has been named as an assistant professor of mathematics here. He earned his bachelor and his master of mathematics in Karachi in Pakistan and his Ph.D. at the University of Pittsburgh. He has taught and done research at University of Karachi, the University of Pittsburgh, and at Kalamazoo College, Michigan.

Annas M. Zarkas

Mr. Annas M. Zarkas has been made an assistant professor economics. He formerly taught at PMC during the year beginning in September of 1964. Mr. Zarkas earned his master of arts from the University of Pennsylvania and an honorary L.L.B. from Damascus University in Syria.

Mr. Peter E. Kise has been named as an instructor in engineering and was formerly a graduate assistant in engineering and formerly a graduate assistant in 1965. He is presently working on his Ph.D. at the University of Pennsylvania.

Mrs. Vincent F. Severo

Mr. Vincent F. Severo has been appointed to the position of lecturer in economics. She has received her bachelor of arts degree at Hunter and her M.B.A. at the Wharton School of the University of Pennsylvania. Mrs. Severo is a candidate for Ph.D. at Penn Graduate School of Arts and Science. She has been an assistant professor at St. Joseph's College.

Schiller Gets Scott Award

Randall E. Schiller, of 360 Lynbrook Road, Springfield, Pa., who will be a junior this year at Penn Morton College has been named the recipient of the Scott Paper Company Foundation Award for Leadership.

The award will pay Schiller's tuition costs at PMC for both his junior and senior years. In addition, the Foundation will make unrestricted grants of \$1,000 to PMC in each year.

To be eligible for the award, a student must be a member of the Colleges' sophomore class who plans to pursue a career in industry or commerce. The recipient is selected by a committee of faculty and students on the basis of demonstrated leadership qualities, plus a high level of scholarship and noteworthy success in extracurricular activities.

In addition, he must possess a balance of desirable personal qualities such as intelligence, integrity, strong moral character, loyalty, enthusiasm, physical vigor, persuasiveness, tact, friendliness and in particular, social adaptability.

Schiller is enrolled in the engineering division at PMC, and is president of the Kiwanis Circle K Club, a member of the Society of Automotive Engineers, and participates in intramural basketball. Off campus, he teaches an eighth grade Sunday School class at Springfield Baptist Church, where he is also active in the Youth Fellowship Program. Schiller is a graduate of Springfield High School. He is the son of Mr. and Mrs. Otto F. Schiller.

During the summer, he is employed by Scott in the engineering division of the plant in Chester.

The Scott Paper Company Foundation maintains Leadership Award programs at 25 other colleges and universities throughout the nation.

School of Engineering

(Continued from Page 1)

Dr. Donald L. Wise, associate professor of engineering.

Another new project is the creation of a Joint Center for Urban Affairs. Aided by an initial grant of \$10,686 from the Department of Health, Education and Welfare and directed by Leonard R. Mann, professor of engineering, the center will be a community service urban extension program serving the city of Chester and its environs by means of an interdisciplinary faculty consulting activity.

Other research is continuing in the areas of emission of exhaust gases from engines, directed by Louis A. Madonna, professor of engineering; vibrations of visco-elastic materials, directed by Dr. Rocco A. DiTaranto, professor of engineering; and diffusion of gases into water, supervised by Dr. Wise. These activities are funded, respectively, by Sun Oil Company National Science Foundation, and the National Institutes of Health.

Dr. Murphy has been a frequent contributor to technical journals and is co-author of "Introduction To System Dynamics," to be published soon by Addison-Wesley.

New Deans

(Continued from Page 1)

assistant to the academic dean, and executive assistant to the President.

Penn Morton College has admitted twelve women for the current semester. They have enrolled in a four year program leading to the degree of bachelor of science in nursing. Under a jointure arrangement with the College of Nursing of the Crozier Foundation, the coeds will be at Penn Morton for the freshman and sophomore years. In September, 1967, coeds are scheduled to be admitted to Penn Morton in all academic programs offered by the school of engineering, and the divisions of management and economics, liberal arts, and science.

Nayar

(Continued from Page 1)

of the state advisory board for editing the gazetteer in Kerala.

Dr. Nayar will be at PMC during the absence of Dr. Franz Gross, chairman of the liberal arts division and professor of political science, who will be serving on the faculty of the University of Dakar in Senegal, Africa.

Tutoring Program Is Created Here

PMC Colleges has established a counseling-tutoring program for freshmen. It will be mandatory for first year students at both Pennsylvania Military College and Penn Morton College whose performance indicates a need for special assistance, and optional for those who seek help despite acceptable scholarship.

The program will begin in September with the opening of the 1966-67 academic year. Tutoring will be limited to the subjects of mathematics, chemistry and physics.

John R. McCullough has been appointed director of tutoring services at the Colleges. A 1959 graduate of PMC, McCullough has been taking graduate work in guidance and student personnel services at the University of Pennsylvania and is scheduled to receive the master of education degree this year.

McCullough expects to have a staff of seven tutors. They will be utilized on a part-time basis. The tutors will include such personnel as graduate students and married women who have appropriate teaching or industry backgrounds. In addition to attending classes in tutored subjects, the tutors will have weekly conferences with the faculty.

Macke

(Continued from Page 1)

month. To eliminate congestion on the cafeteria line, more equipment will be placed in the eating area. Both Mr. Eugene Cloud, PMC's food service coordinator, and Macke representatives have stated that the students' desires and suggestions will be incorporated in their plans, and Mr. Cloud will accept complaints "when accompanied by recommendations."

Macke has been in business for over forty years, but their presence here marks the company's first college mass-feeding plan.

Rutgers Celebrates Bi-centennial

Dr. Clarence R. Moll, president will represent the college in the academic procession of the Rutgers University Bicentennial Convocation to be held on September 22, in Rutgers Stadium.

About 30,000 persons from all over the world are expected to attend the 200th anniversary convocation, which will highlight the year-long celebration of the Rutgers Bicentennial.

Rutgers, the State University of New Jersey since 1945, dates its origin to 1766 when New Jersey Royal Governor William Franklin issued a charter in the name of King George III of England creating Queen's College. The college was renamed Rutgers in 1825 in honor of Col. Henry Rutgers, a New York philanthropist and benefactor of the struggling college.

Student Gov't

(Continued from Page 2)

where only juniors and seniors are permitted to keep a car on campus. Parking space here is not such a premium as in Philadelphia. And I doubt very much if anyone can pay twenty dollars a semester. It is almost cheaper to keep a car in a local garage, and safer. Past experience has proven that. The security system here leaves much to be desired.

I hope the time that you have taken to read what I have had to say has been worthwhile. And I would appreciate any comment or criticism that you may have about Student Council at any time. Thank you again for your consideration, and you will hear from me again soon.

Prosperity is the blessing of the Old Testament, adversity of the New, which carrieth the greater benediction and the clearer revelation of God's favor. Prosperity is not without many fears and distastes and hopes.—Bacon.
